

## Speaker Bio

Anne has 20+ years managing organizational initiatives that drive performance improvement and enhance training logistics. She holds a Bachelor of Science in Electrical & Computer Engineering and Psychology and an MBA in International Business. Anne has a broad range of consulting and instructional experience in business process reengineering, performance improvement, and engineering R&D. Earlier Anne held industry positions in financial systems management, courseware development, and aerospace/defense operations and management.

In 2006 Anne entered the education field, teaching middle-school math and science, and moved to the Massachusetts Department of Elementary and Secondary Education. Among other duties Anne manages the federal Mathematics and Science Partnership grants, the state Financial Literacy Pilot grants, and Massachusetts Digital Literacy and Computer Science Framework development and implementation initiatives.
